## April 2013

The S&P/Case-Shiller Home Price Index recently showed that home prices in 20 major metropolitan areas had increased at the strongest pace since the bubble years. At long last, major national indices are telling the story that local MLS data users have known for months or even years. Yes, the housing market is recovering. The recovery varies by geography and market segment, but things are certainly better than they have been and are showing no signs of letting up.

New Listings in Greater Baton Rouge increased 8.3 percent to 1,236. Pending Sales were up 22.5 percent to 969. Inventory levels shrank 14.2 percent to 3,938 units.

Prices moved higher. The Median Sales Price increased 10.1 percent to \$179,900. Days on Market was down 10.9 percent to 90 days. Absorption rates improved as Months Supply of Inventory was down 25.0 percent to 5.7 months.

The prickliest thorns in our collective side are still lack of inventory and subdued listing activity. In some neighborhoods, consumers have 50 or 60 percent fewer options from which to choose than they did a few years ago. That's causing bidding wars in popular areas. Despite the competitive landscape for buyers, housing remains one of the brightest lights in an otherwise subdued economic recovery.

# Housing Affordability Index

This index measures housing affordability for the region. An index of 120 means the median household income is 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.
